

NES Ncap[®]

Market Leading, Chemically Resistant, DuPont[™] Teflon[®] Encapsulated Seals

1. Quick lead times, including an emergency service for critical projects
2. In-house materials extrusion (Teflon[®] jacket and Viton/Silicone cord) ensures full dimensional and materials control (no tolerance overlap = no air gaps = no failure)
3. Large stocking range of CSDs
4. Only 100% pure (no waste dilution), high grade, western sourced materials (DuPont[™] licensee)
5. DuPont[™] Teflon[®] wall thickness consistency = 20% greater chemical resistance and added mechanical strength
6. Specialise in non-standard shapes and sizes (including cam & groove, non-cam & groove)
7. DuPont[™] Teflon[®] (FEP[®] & PFA[®]) are able to withstand aggressive chemicals and hostile temperatures, whilst themselves remaining chemically inert
